

Delinat Guidelines: Vineyard ecosystem

Green cover throughout the year in every 3rd/7th/20th aisle

At least one aisle in 20 has to be covered with a flower strip and not mulched or mown before 1st July.

From 1 October - 31 March the aisles may be worked only for seeding purposes or for a single in-depth loosening of the soil without damaging the soil surface.

From 1 October to 15 February, the area under the vines may be worked only for seeding purposes.

Burning off scarps, bushes, hedges and the edges of the vineyard is forbidden

hotspot of biodiversity with tree
min. 30 m² per
5 / 3 / 1 ha

Min. number of bushes either at the end of rows or in the middle of the vines.
0 / 5 / 30 per hectare

At least 7% ecological compensation area in or neighbouring the vineyard.
For example:
-shrubland
-poor grassland
-ponds
-garrigue
etc.

**Max. distance of a
vine to the next
tree.
500/ 300/ 80 m**
